DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U.S. Publication 2005/0210085 to Bessiere is the reference closest to the claimed invention. Bessiere discloses selecting according to a predefined selection criterion one of the combinations of values of the specific parameters based on the representation of the previously constructed tree-shaped probability distribution. However, Bessiere does not teach a method of generating a list of parameter value combinations to test, the method comprising: (a) providing to a user a graphical user interface that includes at least two adjustable probability curves that allow the user to graphically indicate the importance of values of at least first and second parameters; (b) converting the probability curves into probability functions; (c) combining the probability functions into a combination function; (d) selecting parameter value combinations that result in the combination function exceeding a predetermined probability value; and generating the list of parameter value combinations to test, the list including the selected parameter value combinations; and including all of the other limitations in the respective independent claims.

U.S. Publication 2005/0210085 to Bessiere is the reference closest to the claimed invention. Bessiere discloses selecting according to a predefined selection criterion one of the combinations of values of the specific parameters based on the representation of the previously constructed tree-shaped probability distribution. However, Bessiere does not teach a computer system having a graphical user interface including a display and a user selection device, a

method of testing a software module with parameter combinations, comprising: (a) displaying in a first region of the display a list of parameter combinations; (b) displaying in a second region of the display an input icon; (c) receiving an indication from a user to drag at least one of the parameter combinations to the input icon; and (d) in response to (c) displaying in a third region of the display an output of the software module; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
